SUMMARY

Results-driven Data, Product & Business Analyst with 2 internships of hands-on experience in data analysis, business intelligence, ETL pipeline development, and product development. Proficient in Python, SQL, Power BI, Tableau, and Excel for building interactive dashboards, KPI tracking, and data visualization. Experienced in translating business requirements into analytical solutions, working with BRDs and PRDs, and delivering actionable insights to cross-functional stakeholders. Skilled in A/B testing, statistical analysis, data warehousing with Snowflake, and cloud deployment on AWS.

EDUCATION

B.Tech in Electrical Engineering

Govind Ballabh Pant University Of Agriculture & Technology, Pantnagar	6.860 CGPA	2022-2026
Grade XII, CBSE		
Nirmal Ashram Deepmala Public School, Rishikesh	86.4%	2021
Grade X, CBSE		
Nirmal Ashram Deepmala Public School, Rishikesh	88.8%	2019

EXPERIENCE

1. Interviewkit.ai Apr 2026 – Jun 2026

- Product Analyst Intern*
- **Product Development & Strategy:** Collaborated directly with the founder on **Product Development, Sales Operations, and Strategy**; took end-to-end ownership of **2 key product** features from ideation to deployment.
 - **Built Job Description Suggestion Module:** Ideated and implemented a **keyword extraction-based suggestion module** that analysed user profiles and matched them with **50+ relevant job roles**, reducing manual job-search effort significantly.
 - **Resume-Based Q&A System:** Built a system auto-generating **10+ personalized interview questions and model answers** per candidate resume; also built **product metrics dashboards** tracking **3+ KPIs** using Excel.

2. Sapienplus AI Research and Analytics LLP Jun 2024 – Aug 2024

- ML Analytics Intern*
- **Built ETL Data Pipeline:** Created a Python-based ETL pipeline for time-series data, extraction from S3 Bucket, transformation using Pandas, and structured storage of financial datasets using AWS Boto3 SDK.
 - **Jupyter Educational Notebooks:** Created comprehensive Jupyter notebooks covering NumPy, SciPy, Pandas, Matplotlib, Seaborn, Plotly, Statsmodels, and Scikit-learn, **7 notebooks structured on 23 datasets** with progressive complexity with a focus on financial time-series applications for quant professionals.

PROJECTS

1. Automated Insect Detection & Counting System [\(Github Link\)](#) Mar 2026 – Jun 2026

- Developed an end-to-end computer vision project using **YOLOv8** trained on 520 annotated images, achieving **93% mAP@50** for real-time fruit fly counting with automated CSV logging and timestamp tracking, deployed PyTorch model on **Raspberry Pi 4** with HQ Camera.
- Designed and ideated complete 3D-printed enclosure system for mounting camera, electronics, and pheromone trap, integrating automated counting logic for agricultural monitoring applications.

2. Real Estate Analytics [\(Github Link\)](#) Dec 2025 – Jan 2026

- Developed an end-to-end ML pipeline, benchmarking 10+ algorithms to select a **Random Forest** model achieving a **0.91 R^2 score** via K-Fold Cross-Validation.
- Built a multi-page **Streamlit** dashboard featuring dedicated for **Price Prediction, Analytics Module, Insights Module**, and also added **Recommender System** for similar apartment discovery.
- Deployed the scalable application using **AWS EC2 and S3**, implementing advanced data cleaning and outlier treatment for high-dimensional real estate datasets.

3. HR-Analytics-Dashboard-Tableau [\(Github Link\)](#) Jun 2026 – Jun 2026

- Expanded project into 2-page, 15-chart interactive **Tableau** dashboard for **data visualization**, using precise vertical/horizontal container layouts and a custom **Figma**-designed UI/UX background for a polished, stakeholder-ready presentation.
- Built expressive, hierarchical **tooltips** embedding nested charts within charts, combined with page-level **filters** and slicers for granular, self-service **data exploration** and analysis.
- Authored **calculated field** (DAX-style) logic to power dynamic **Top-N** color-coded rankings and key KPI metrics, and implemented a fully functional multi-page **navigation** system with one-click **export** for reporting.

SKILLS

- Python • Figma • SQL • Microsoft Excel • Power BI • Tableau • Looker Studio • Machine Learning
- Statistics • Data Visualization • Data Analysis • A/B Testing • Product Analytics • Business Intelligence

POSITIONS OF RESPONSIBILITY

The Robotics Club, Pantnagar Oct 2023 – Jun 2026

- Vice Chairperson (Final Year); Executive Member (3rd Year)*
- **Leadership, Mentorship & Coordination:** Directed club operations across cross-functional teams ensuring on-time delivery; delivered a technical workshop on **"AI in Robotics"** to **100+ students**; led design reviews and material selection cutting manufacturing inefficiencies and strengthening team collaboration.

CERTIFICATIONS

- **NPTEL Elite Certification** — Data Analytics with Python | IIT Roorkee | Score: 73% 2024
- **Foundation Level Certificate** — Data Science and Applications | IIT Madras 2024
